EDUCATION

Thakur College of Engineering and Technology
Bachelor of Engineering in Computer Engineering; CGPA: 8.95/10.0

Mumbai, India
October 2022 – June 2026

Rajasthan State Board
Higher Secondary Certificate: 78.60% | Secondary School Certificate: 71.00%

Rajasthan, India
2020 – 2022

PUBLICATIONS

Published Review Paper | TIJER Vol. 12, Issue 11 | DOI: 10.56975/tijer.v12i11.160345

2024

PROFESSIONAL EXPERIENCE

Technical Head

July 2024 – August 2025

Computer Society of India, TCET

Mumbai, India

- Lead technical operations for 50+ student members across software development projects, hackathons, and technical workshops
- Organize coding competitions and seminars, increasing student participation by 40% through strategic event planning
- Collaborate with industry professionals to design curriculum-aligned technical events and guest speaker sessions

Computer Engineering Intern

December 2024 – January 2025

Lupin Human Welfare and Research Foundation

Palghar, India

- Architected full-stack healthcare portal using Django and React, managing patient records, visit tracking, and appointment scheduling for 500+ beneficiaries across 3+ community development projects in farming and medical areas
- Enhanced backend REST APIs, resolving 10+ critical bugs and improving response time by 25% through database query optimization and implementing caching mechanisms
- Conducted fieldwork in rural farming and medical communities, supporting social welfare initiatives and gathering requirements for digital healthcare solutions

TECHNICAL PROJECTS

AmbedkarGPT | Python, LangChain, ChromaDB, Mistral, FastAPI, Docker | [Code](#)

January 2025

- Engineered production-grade RAG chatbot using sentence-transformers and ChromaDB vector database for 500+ semantic queries with 92% retrieval accuracy
- Integrated Mistral 7B LLM via Ollama with custom prompt engineering, reducing AI hallucinations by 60-70%
- Containerized application with Docker and deployed scalable REST API using FastAPI with asynchronous request handling

ConvertiseAI | Python, FastAPI, Streamlit, Transformers, NLP | [Code](#)

November 2024

- Developed transformer-based content repurposing system using Hugging Face models, reducing manual rewriting effort by 70-80%
- Created RESTful backend with asynchronous processing and implemented intelligent caching strategies, reducing processing time from 30 seconds to 5 seconds per document

SMS Spam Classifier | Python, scikit-learn, TF-IDF, Machine Learning | [Code](#)

August 2023

- Constructed end-to-end ML pipeline processing 5,000+ SMS messages, achieving 95% classification accuracy using TF-IDF vectorization
- Evaluated Naive Bayes, Logistic Regression, and SVM algorithms with GridSearchCV hyperparameter optimization

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML/CSS

Data Structures & Algorithms: Arrays, Linked Lists, Trees, Graphs, Dynamic Programming, Greedy Algorithms, Sorting, Searching

AI/ML & Data Science: LangChain, PyTorch, TensorFlow, scikit-learn, Pandas, NumPy, Transformers, Hugging Face, RAG Systems

Backend & Frameworks: FastAPI, Django, Node.js, Express.js, REST API, Streamlit

Frontend & Database: React, MongoDB, ChromaDB

DevOps & Cloud: Git/GitHub, AWS, Google Cloud Platform

Tools & Platforms: VS Code, Postman, Jupyter, Power BI, Tableau

CERTIFICATIONS

Google Professional Cloud Security Engineer | FreeCodeCamp Machine Learning with Python | [AWS Solutions Architecture Job Simulation](#)
[Cisco Data Analytics Essentials](#) | [EA — Software Engineering Job Simulation](#) | [Cisco — Data Science Essentials](#)

ACHIEVEMENTS AND ACTIVITIES

Technical Head at CSI-TCET managing 50+ members and organizing 10+ annual technical events | Active problem solver on LeetCode DSA problems solved | Open-source contributor on GitHub with multiple AI/ML and full-stack repositories | Published research paper in TIJER academic journal
